

ACC 2026: 振兴蓝图 REVITALISATION BLUEPRINT

Across Cycling Club Munich

SYSTEMATIC UPGRADE, NOT A BLANK SLATE

Across Cycling Club has carried the passion of Munich's Chinese cycling community for three years. But passion without structure leads to stagnation.

Internal Satisfaction is the Foundation of External Influence

The Five-Pillar Content Ecosystem

Our operations are divided into five distinct but deeply interconnected modules. Local rides generate media, which demands gear and training insights, all anchored by our proprietary route data. Every action feeds the next.

Pillars 1 & 2: The Physical Pulse and the Digital Legacy

Munich Daily (慕城日常)

Integrating cycling into daily life with structured routines tailored for all levels, from intense Fast Tuesday sessions to relaxed coffee rides.

Social Rides
Fast Tuesday Training
Weekend Long Rides
Gym Sessions

Highlight: ACC 2026 Spring Coffee Ride (18 April)

Media Archive (车影骑踪)

Capturing the authentic narratives of our community through high-quality visual documentation, multi-day expedition logs, and intimate rider interviews.

Video Archives
Rider Interviews
Multi-day Expeditions

Highlight: The 300km Epic Expedition
from Garmisch to Lake Garda

Highlight: RAD RACE ONE TWENTY

Pillar 3: Structured Gear Intelligence

Moving beyond scattered advice to build a comprehensive, modular knowledge graph.

The ACC Advantage: We leverage our unique European perspective to deliver deep-dive analyses, European sourcing strategies, and modular maintenance frameworks that bridge the information gap for our community.

Pillar 4: Precision Over Platitudes in Science and Training

We refuse 'correct nonsense'. Our training and safety content must deliver exact methodologies, not vague encouragement.

	Old Way	ACC 2026 Way
The Approach to Improvement	Supplying rigid, one-size-fits-all training plans.	Teaching structural frameworks (progressive overload, periodisation) so riders build their own plans.
The Approach to Safety	Saying "just build confidence on descents."	Breaking down exact braking zones, line selection, and aerodynamic posture.
The Approach to Errors	Ignoring crashes.	'Unscientific Cycling Guides' – analysing crash footage to extract real-world lessons.

Pillar 5: The Definitive Regional Route Database

A searchable, ever-expanding repository of Munich's best cycling routes, enriched with difficulty metrics, elevation profiles, and automated Strava API synchronisation.

We do not just ride the Alps; we map them for the entire community.

Platform Strategy: Targeted Reach Anchored by a Central Hub

We deploy distinct content formats to targeted platforms, all funnelling back to our proprietary ACC ClubHub—a minimalist, diamond-navigated website that cements our professional authority.

The Operational Roster

Clear accountability mapped directly to the 2026 content architecture.

Pillar	Execution Focus	Personnel
Media Archive	Shooting & Socials / Interviews	Xiao Shen, Zhang Zenme, Ma Gongmei Speaker A & B
Munich Daily	Training Days / Route Planning	Speaker B Zhang Zenme, ZDY, Xiao Shen
Gear Guide	Workshops / Intelligence Sharing	Lin Ge Shen Pro, Ma Gongmei
Science Training	Theory / Safety Tech	Speaker B, Ma Gongmei, Zhang Zenme Shen Pro
Back-End Ops	Web & Platform Operations	Xiao Shen

The Host Protocol: Connecting Global Riders to European Tarmac

For Chinese cyclists travelling to the birthplace of cycling culture, ACC acts as the definitive local bridge. We eliminate the friction of navigating foreign terrain, securing equipment, and understanding local nuances, transforming a daunting trip into a turn-key cycling adventure.

The ACC Sustainability Flywheel

Commercialisation is not a departure from our ethos; it is the engine that protects it. By monetising our influence through sponsorships, tailored merchandise, and premium host services, we ensure our internal community activities are fully funded, so our members never burn their own resources.

Working Principles: High Output, Zero Friction

Working Principles: High Output, Zero Friction

Efficiency First

No multi-hour meetings with zero output. If it can be discussed in the saddle, it does not need a boardroom.

One Action, Multiple Assets

A single rider interview must yield text for the Hub, video for Bilibili, and photos for Xiaohongshu. Eradicate redundant labour.

Structural Thinking

Every piece of content must map to a larger knowledge architecture. We track what is built and what remains blank.

Rapid Iteration

Perfect is the enemy of shipped. We launch pilots, gather data, and refine on the move.

The Execution Profile: Approaching the 2026 Season

Our immediate roadmap demands focused alignment before scaling our output. We are securing our core peloton, building the digital infrastructure, and testing our modular approach before full deployment.

Let's ride together. Let's make it happen.

Good content speaks for itself.
Good communities grow themselves.
Good passion is contagious.

When the world talks about cycling in Europe, the first name they will think of is ACC.

— ACC Revitalisation Working Group, 2026
